

SmartBed

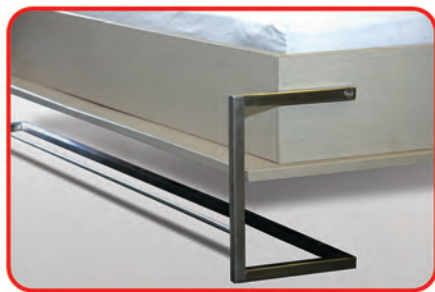

more space
for your living

Looking to create additional guest space
or simply make the most of the existing?

The SmartBed is the ideal solution.

Manufactured in Australia, our beds are suited to your home, apartment, property development, renovation or commercial application. The SmartBed gives back the space you need or creates that additional guest room. Stylish and compact by day, practical and as comfortable as your own bed by night.

The SmartBed is made entirely from Laminex™ Commercial grade 18mm material. Resulting in a modern seamless finish. Select from our high quality finishes from the Laminex Commercial Colour Palette (laminex.com.au) or ask about our custom options available. For example 2pac paint finish, timber veneer, Laminex™ Fusion Range or other finishes to suit your existing decor.

The Smart bed is fitted with a German “BETTLIFT” mechanism, integrated into the structure of the bed cabinet. Operated by a counterbalanced gas filled strut, allowing for that redimade bed to be instantly available. Easily operable by the elderly and children alike. This system eliminates the use of wearing spring mechanisms as found in cheaper wall bed alternatives.

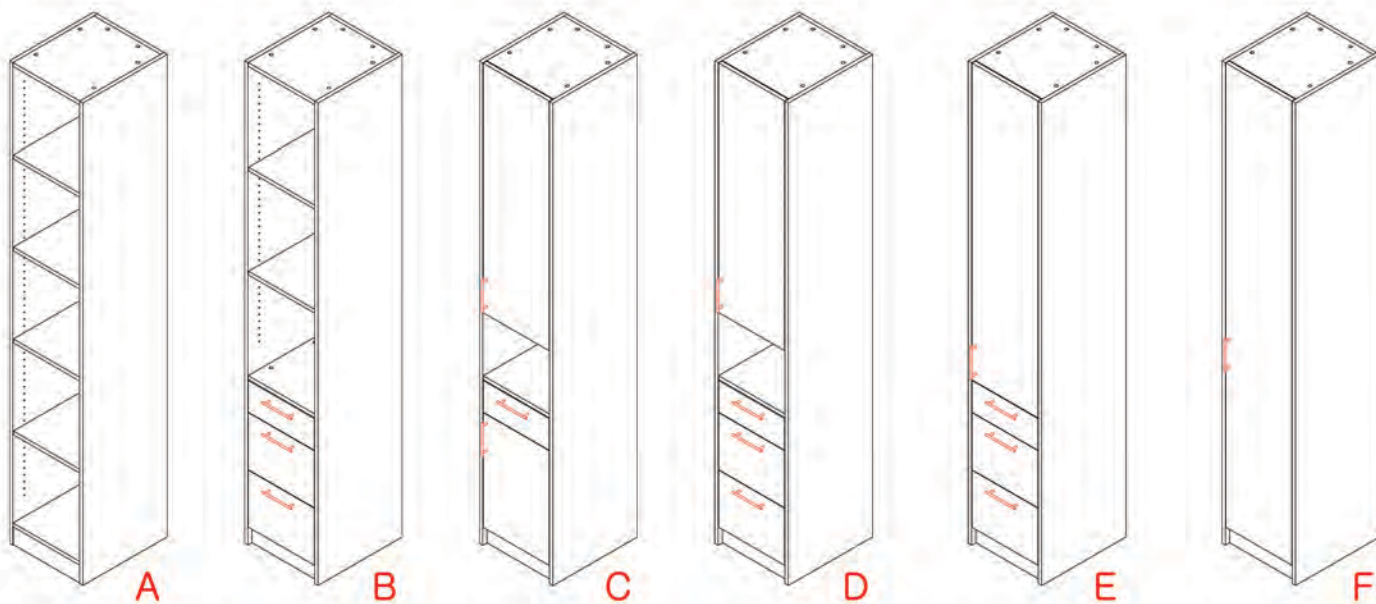

For a simple solution suited to your style, look no further than the SmartBed.

When stored away the SmartBed occupies only 460mm of depth into the room. However the SmartBed can accommodate any mattress thickness or depth requirement upon request. Available in all bed sizes to suit every space. An Australian made Sleep Better mattress can be arranged if required, with two quality choices available.

Standard Cupboard Range
Size: 460mm (d) x 400mm (w)

All beds are 460mm deep.
Variable depths available on request.

Size	Width	Height	Protrusion into room when open
Single	1086mm	2116mm	2100mm
King single	1236mm	2276mm	2260mm
Double	1546mm	2116mm	2100mm
Queen	1696mm	2276mm	2260mm
King	1996mm	2276mm	2260mm

Compliment your SmartBed with modular accessories to add to your new addition. Be it cabinets (as above) or a desk to support the home office, study or spare room with functional work or storage space. Made to suit your chosen SmartBed finish.

Full installation service available, for all domestic or commercial requirements.
